Truck Mounted Crane

features

2

A powerful superstructure on a powerful chassis makes this 90 US ton truck crane unbeatable on the road and on the jobsite.

The superstructure features a full power five section MEGAFORM boom that can reach to a maximum tip height of 150 ft. The TWIN-LOCK boom pinning system provides pre-selection of boom extension modes to efficiently pin boom sections automatically.

A bi-fold swingaway lattice extension easily stows on the side of the base boom for easy transport. The choice of a manual or optional hydraulically offsettable extension is available. To take

it even further, up to two additional extension inserts can be added to provide up to 237 ft. of tip height.

Two-stage inverted jack outriggers provide 3 position settings – 0%, 50% and 100%.

Front and rear air over walking beam suspension provides a smooth ride at 65 mph. Aluminum wheels, fenders and decking are also standard features.

Up to 31,500 lbs of counterweight can be power installed and removed from the superstructure cab, making transporting a breeze.

Crane functions are controlled by ECOS (Electronic Crane Operating System) with CAN-BUS. The EKS4 load moment indicator provides detailed feedback and control of the cranes operating functions. Electronically controlled ISM 450 diesel engine delivers plenty of power on and off the jobsite.
